## Electrical Design Technician

Flavourtech is an Australian company, which manufactures high technology process equipment for the food and beverage industries. The company is enjoying substantial success internationally, selling innovative systems based on its unique Spinning Cone Column and Centritherm® Evaporator technologies.

Complementing this, Flavourtech's electrical division has established itself as a high-quality manufacturer of electrical switchboards and control panels, with a strong focus on quality and meeting customer requirements and expectations.

Flavourtech was recently recognized as National winners of the 2018 Australian Export Awards in the Manufacturing Category and finalists in the 'Outstanding Employer of Choice' and 'Excellence in Export' categories at the 2018 State Business Awards.

We seek a suitable person to join our electrical design team. Reporting to the Electrical Manager the role entails various aspects of design of electrical systems including:

- Preparation, assembly and submission of budget estimates, tenders and quotations
- Design and specification of electrical systems
- Develop, assemble and keep up to-date electrical documentation including, schematic diagrams, layout drawings, design/equipment specifications, labeling systems and wiring schedules
- Use design computer software efficiently to complete assigned work
- Programming & setup of variable speed drives and instrumentation on plant & equipment
- Assist with the supervision and training of electrician's, apprentices and subcontractors
- Adherence to workplace, Health & Safety site standards

The successful applicant will have the following qualifications and/or experience:

- Electrical Trade certificate
- Current NSW electrical license
- Good working knowledge of current electrical standards and regulations
- The ability to read, interpret and understand engineering drawings (Plans, elevations, sections, P&IDs, electrical schematic diagrams and wiring diagrams)
- As a minimum have a Class 'C' manual driver's license

The successful applicant will:

- Be committed, self-motivated and able to operate without direct supervision
- Can work in a highly motivated and empowering team environment
- Possess experience across a broad range of systems
- Have good organisational skills
- Be willing to undertake some overseas and domestic travel
- Have excellent interpersonal, oral and written communication skills
- Strong computer skills will be highly regarded

Experienced electricians willing to apply their practical skills to a design role are encouraged to apply as on the job training will be provided to the successful applicant.
